Profile

Junior Backend Developer specialized in Node.js ecosystem, experienced in building scalable APIs and backend systems. Skilled in Express, NestJS, Sequelize, Prisma, MongoDB, PostgreSQL, and Redis. Strong understanding of authentication, caching, and deployment. Proven through 5 diverse backend projects simulating production-level systems.

Skills

Languages & Runtime: JavaScript (ES6+), TypeScript, Node.js

Frameworks: Express.js, NestJS

Databases: MongoDB (Mongoose), PostgreSQL, MySQL (Sequelize), Prisma ORM

Caching & Messaging: Redis

Tools & DevOps: Git, Docker, Postman, Jest, Stripe API, JWT, Bcrypt

Practices: REST APIs, GraphQL basics, Authentication & Authorization, CI/CD, Agile

Projects

Hotel Booking System – *Express + Sequelize + MySQL + Redis*

Developed REST APIs for hotel, room, booking, payment, and review modules. Implemented JWT authentication with role-based access. Integrated Stripe for payments and Redis caching. Added soft delete + cascading delete using Sequelize hooks. Deployed with Docker.

E-commerce Platform – *NestJS + Prisma + PostgreSQL*

Designed modular architecture using NestJS and Prisma ORM. Built product, order, cart, and user APIs. Implemented Redis cache and Stripe integration. Wrote unit & e2e tests using Jest.

Social Media API – *Express + Mongoose + MongoDB*

Created user, post, comment, and notification APIs. Implemented real-time notifications with WebSockets. Designed aggregation pipelines. Applied soft delete with Mongoose hooks. Secured app with bcrypt + JWT.

Smart Notes App (SaaS Simulation) – *NestJS + Prisma + PostgreSQL + Redis*

Built GraphQL API with NestJS and Prisma. Added OTP-based password reset and JWT authentication. Implemented file uploads and AI-powered note summarization using OpenAI API. Used Redis for rate limiting.

Online Learning Platform – *Express + Sequelize + MySQL*

Developed APIs for courses, lessons, instructors, and enrollment. Added role-based authorization. Integrated Nodemailer for email notifications. Built search & filtering with Sequelize operators. Deployed on AWS with Docker.

Education

B.Sc. in Computer Science (or related) – [Your University], [Year]

Languages

Arabic: Native

English: Professional Working Proficiency
